

Preface

This report was written as an internship project with Clean Wisconsin, formerly the Wisconsin Environmental Decade. It was written under the direction of Rich Bogovich. The objective of this report is to provide information regarding Wisconsin as a potential high-level nuclear waste disposal site.

This report was also written for college credit at the University of Wisconsin-Madison Department of Geology and Geophysics as a directed study under the guidance of Hydrogeology Professor Mary Anderson. Tom Evans, PhD. Wisconsin Geologic and Natural History Survey UW-Extension, and Michael Corradini, Professor of Engineering Physics and chair for the Nuclear Waste Technical Review Board, provided information regarding this report. As well, Marie Dvorzak, UW-Madison Geology and Geophysics Library Director, and Raycine Hodo, graduate student in hydrogeology, provided useful support and assistance towards this project.
