

CLEAN POWER PLAN

A new plan, a new path, a multitude of benefits

34%
reduction in carbon emissions in WI from 2005 levels by 2030

equals
\$34B-\$54B
health & climate benefits

9000
fewer asthma attacks in children nationwide

1,500-3,600
 premature deaths avoided annually

\$12B
spent annually to import fossil fuels

which can be offset by investing in WI's more than
1000
clean energy businesses

average utility bill will decrease by

per month

but only if Wisconsin's leaders commit to a cleaner future
The time is now
