

THE BENEFITS OF GREEN INFRASTRUCTURE

— **Enhancing Community Resiliency** —

- Reducing stormwater impacts (damage caused by flooding).

— **Utility** —

- Collect rainwater in Rain Barrels to reuse the water instead of using the water from your hose.
- Potential cost-saving benefits.

— **Increasing Neighborhood Pride** —

- Beautification aspects (flowering plants, landscaping aesthetics with trees, and gardens).
- Connecting with other residents and enhancing relationships.

— **Environmental Enhancement** —

- Increasing water quality by reducing pollutants that enter our local waterways through storm sewers.
- Addition of pollinator habitat (bees, butterflies, birds).
